Title: GENERAL EDUCATION PATHWAY REQUIREMENTS IN THE ASSOCIATE IN APPLIED SCIENCE DEGREE PROGRAMS	Code: DD1100
---	--------------

Policy Reference: N/A

All students enrolled in Associate in Applied Science (AAS) degree programs are required to complete a 15-credit liberal arts and sciences component.

Beginning in the fall semester 1989, the General Education Academic & Career pathway requirements for the AAS degree programs were expanded to include a broader range of 100-numbered AAS degree courses and 200-numbered Liberal Arts (College Transfer) courses. This will broaden the available course options for students and will encourage students to select 200-level courses as part of their liberal arts and sciences core. This will also allow students to expedite transfer of courses to four-year colleges and universities, since 200-series courses at MATC have now been articulated for transfer to private and public four-year colleges and universities in the state.

The MATC Catalog describes new options for substituting 200 series college transfer courses for 100 series Associate in Applied Science (AAS) degree requirements. Faculty, advisors, and counselors will establish a recommended program plan to meet individual needs of students.
